

The Blissfield Brief

January 2025

“Ambition is when you close the gap between your circumstances and your expectations. Entitlement is when you expect others to close the gap between your circumstances and your expectations.”
James Clear, Atomic Habits

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Availability of Monitoring Data for Unregulated Contaminants for the Village of Blissfield Drinking Water – 3rd and 4th Quarter.

Our water system has sampled for a series of unregulated contaminants. Unregulated contaminants are those that don't yet have a drinking water standard set by EPA. The purpose of monitoring for these contaminants is to help EPA decide whether the contaminants should have a set standard. As our customers, you have a right to know that this data is available. A copy of Blissfield's results for the July 2024 and October 2024 sampling are on the reverse side of this notice. Please contact Nora Kiefer, Blissfield water treatment supervisor at 517-486-3350 or waterplant@blissfieldmichigan.gov, if you have any questions regarding the results.

Explanation of attached report: You will see five (5) columns,

- 1) The date of collection for the sample
- 2) Analyte – the contaminant that was being tested for
- 3) Result measurement - < MRL in the Result field indicates the result was less than the UCMR minimum reporting level (MRL). Only analytical results at or above the UCMR MRL are reported to the EPA.
- 4) Minimum reporting limit (MRL) - The MRL is defined as the smallest measured concentration of a substance that can be reliably measured by using a given analytical method.
- 5) EPA Status – Shows that our results have been received and approved by the EPA.

EPA data finder is available [HERE](#). Under PWS on the left search bar– type Blissfield and our data will appear for.

Additional information regarding UCMR5 can be found [HERE](#).

This notice is being sent to you by The Village of Blissfield Water Treatment Plant.

Collection date	Analyte	Result Measure $\mu\text{g/L}$	Minimum Reporting Limit (MRL)	EPA Status
7/16/2024	Lithium	< MRL	9 $\mu\text{g/L}$	Approved
